

Mahidol University

September 26, 2025

Dear the President of Japan Advanced Institute of Science and Technology,

It is my great pleasure to strongly recommend Mr. Pakin PANAWATTANAKUL, an undergraduate student in the computer engineering international program, for the MEXT Scholarship to pursue his Master's degree at the Japan Advanced Institute of Science and Technology (JAIST).

Mr. PANAWATTANAKUL studied two courses with me, i.e. computer architecture and operating systems. His performance was great in both courses. He had shown his ability of learning, analytical skill, hard-working, reliable and strong determination. He had devoted himself to non-academic activities and worked very well with his classmates. He was confident in himself and, at the same time, respects other people's ideas. He is studying his fourth year of computer engineering program. His academic record is very good (3.87 GPA). His computer engineering project is about using FPGAs as hardware accelerator for Post-Quantum Cryptography. His research interested fields are computer architecture and hardware accelerator design. From software side, he has good background at system programming level. In early 2026 he will be working as an apprentice at JAIST under supervision of Professor Kiyofumi TANAKA. This is a great opportunity to learn and research more about FPGA at prestigious institute.

I am confident that Mr. PANAWATTANAKUL possesses all the qualities necessary to succeed in a demanding graduate program at JAIST and do believe that he will successfully study there and the knowledge gained will finally benefit his future career and this society. Should you have any questions or need further information, please do not hesitate to contact me by email: thanadol.pri@mahidol.ac.th

Sincerely yours,

(Asst. Prof. Thanadol Pritranan)

Advisor

(Asst. Prof. Konglit Hunchangsinh, Ph.D.)

Program Director of Computer Engineering

Science Division

(Prof. Chulathida Chomchai, M.D.)

Dean of Mahidol University International College
